Standard Teflon

Milk Warmer Electric

standard	204 616	\$549.00	\$499.00
teflon	204 618	\$625.00	\$549.00

There is no doubt calves do better on warm milk. Our 240 volt Milk Warmer uses a 2000 watt element encased in alloy for immersing in milk, or any liquid, to a maximum 70cm depth. For deeper containers, and plastic bottom containers, machine must be suspended or stood on a suitable stand. (Do not suspend warmer by the handles - see our suspension devices below.) Our Teflon-coated model reduces the tedious task of cleaning milk from the element area.

These warmers will heat 100 litres of milk from 17°C to 37°C in approx 1 hour. Lift out and rinse-off immediately. When fed warm milk, calves grow faster and have less disease, and will quickly pay for the value of the milk warmer. For warming large volumes (trailers etc) we suggest you use a standard electric plug timer, set for required time before feeding. Milk will be warm when you are ready to go.

Note: Rubbing cooking oil into the element before using will reduce milk deposits. If used for heating colostrum, you must thin with warm water, or stir frequently to prevent build-up on element.

PRICE REDUCED

Milk Warmer Suspension Bar

Milk Warmer Suspension

bar complete	207 524	\$29.95	\$29.95
kit complete	204 620	\$89.95	\$79.95

When warming milk in large containers the warmer can require suspension off the bottom. We have two devices for this purpose:

Suspension Bar: (see above) simple aluminium bar which is easily clipped on and off the warmer shaft. Span to 50cm. **Note:** The hose clamp supplied must be used tightly on the shaft immediately under the warmer handle unit, to prevent loading the handle. (Position clip head to take load).

Suspension Kit: (see next column) a more substantial device which is clamped on to the warmer shaft. The arms swing down when not in use. All galvanised. Span to 60cm. We recommend this one.

New

Milk Warmer Drum Blanket

212 337 \$995.00

Developed in New Zealand, the 900W 240v Drum Blanket wraps around a 200 litre plastic or metal drum. A stretch-cord lace allows for easy placement and removal. This device will heat 200 litres of milk or colostrum from 15°C to 28°C in 4 hours. The blanket is thermostatically controlled, so will not over-heat the milk. Power demand is quite low at 900W, so should not cause issues in poorly serviced buildings. Using this blanket there are no cleaning issues and should not be coagulation of milk, as long as it is stirred well from time to time (stirring regularly will reduce heating time.) If the blanket is left on longer than required, the milk should not get hotter than 40°C, due to the safety thermostat in the blanket. Keeping the drum indoors, in a warm still atmosphere whilst heating, will reduce heating time and power usage.

Calf Neck Bands

10-pack single colour	\$12.95
10-pack mixed colours	\$14.95

blue	208 957	red	208 960
green	208 958	yellow	208 961
orange	209 166	mixed	207 415
pink	208 959		

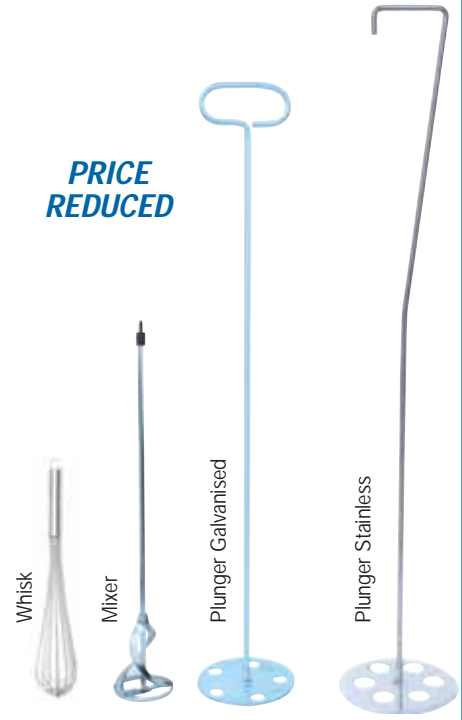

Hook and loop type nylon bands for quick and easy calf identification, whether for identity at birth, or for signifying treatment with antibiotics or sulphur drugs. Also useful for marking different age, rearing or treatment groups. Washable and reusable. Highly visible neon colours. 59cm long. 2.5cm wide. Pack of 10 only.

MILK POWDER....

PRICE REDUCED

Whisk

Mixer

Plunger Galvanised

Plunger Stainless

Whisk

45cm o.a.	204 612	\$29.95	\$25.95
60cm o.a.	204 613	\$34.95	\$29.95

You know they work well for whipping cream, so here is a jumbo version for mixing milk powder. Made of stainless steel. Fastest cleanest method yet for mixing smaller quantities of powdered milk. Dimension is length o.a.

Mixer

63cm o.a. 204 605 \$19.95

For smaller containers put this mixer in your electric drill for a fast mix. Nifty little knob on top is to hang it up (remove to fit in drill). All galvanised steel. Length 63cm o.a. Disc dia 10cm.

Plunger Galvanised

100cm o.a. 204 606 \$74.95

Simple traditional plunger makes quick work of mixing milk powder in larger containers. All galvanised steel. Length 1 metre o.a. Disc dia 17cm.

Plunger Stainless

110cm o.a. 204 610 \$175.00

All stainless steel very efficient milk powder mixers. Dimension is length o.a. Disc dia 22cm.

New

Whisk Farmhand

89cm o.a. 213 925 \$59.95

Used in a cordless drill, this mixer is fast and efficient. When spun-up the wire loops spread out and beat powder lumps smooth in seconds. This whisk is ideal for deep containers, such as 200-litre drums. All stainless steel. Length 89cm o.a.
