

**Nursing Kit Mothering Kit**  
complete 204 870 \$7.95

This kit is most suitable for nursing very small animals such as mice, rats, guinea pigs, rabbits, hamsters and small wildlife. It comprises a special 10ml capacity extended-tip syringe and three tiny nipples, each 4mm diameter x 30mm long. Cut a small slit in the nipple tip before use. Fill the syringe with milk substitute, glucose or water as required, and squeeze gently into the animal's mouth. Syringe and teats are washable and reusable. Sterilise before use.

**Nursing Kit Pet Nurser**  
small (50ml) 204 872 \$12.95  
large (150ml) 204 871 \$12.95

Nice little nursing kit including: bottle, teat, spare teat and cleaning brush. Ideal for saving or raising kittens, piglets, puppies, rabbits or other small animals. Instructions supplied. Bottles have graduations marked, for exact feed quantities. Teats are of soft silicone rubber. Cut a small cross-slit in the teat before use. Bottle and teat are washable and reusable. For safety, sterilise each time before use. Teats are same size for both kits.

**Nursing Kit Syringe & Dropper**  
set 220 747 \$7.95

For administering liquid food or medicines to small animals. Set comprises of a 10ml catheter-tip syringe and a 3ml dropper. Both have simple, clear units of measure. Non-toxic plastic.

**Teat Latex**

- Bare each
- kitten (1) 206 712 \$2.95
  - puppy (2) 219 537 \$2.95
- On bottle each
- kitten (3) 220 344 \$6.95
  - puppy (4) 220 343 \$6.95

These are good-quality natural latex teats for feeding new-born kittens and puppies. Supplied as bare teat, or on a 50ml bottle ready to use. (Teat will fit any bottle with neck 15-18mm o.d.). A normal feed for a newborn is about 30ml. Do not overfeed. Bottle is supplied with cap so feed can be stored and transported leak free.

**NB:** These teats are not pre-cut. Cut to suit.

**Dog Nail Clipper Lightweight**  
13cm 211 968 \$10.95

These small nail clippers are very light to handle and feature moulded 'soft-grip' rubber handles for an accurate and easy grip. Length 13.5cm o.a.

**New**

**Clipper Quality**

- standard 202 147 \$23.95
- quality 202 146 \$49.95

Both these clippers are high quality. One made in Italy (standard) and one in Germany (quality). Both make clean 'guillotine-style' cuts with stainless steel blades. Both 17cm-long o.a. We suggest vets and professionals choose the 'quality' clipper.

**Tablet Introducer Genia**

- each 219 992 \$4.95

Fill the syringe with water then pop the tablet in the soft tip. Squirt down the pet's throat. Tablet should go straight down with the water. (Sweetened water can help with the swallow reflex)

**Hot/Cold Pack Reusable**

- 320gm 219 449 \$9.95

Store in the freezer for cold therapy use. Microwave or boil for heat therapy. Ideal for animal or human use. Size 25cm x 12cm. Weight 320gm. Instructions on back of pack. This pack is made from hard-wearing woven material, not simple plastic as some similar products are.

**THERMOMETER...**

**Capillary Small Animal**

- 206 808 \$4.25

This small capillary thermometer is especially suitable for small animal rectal use, due to its very thin 3.6mm tip. But we recommend care if used on larger animals, as it can easily be lost or dropped. Range 35°C to 40°C (some practice can be required to read easily). Supplied in plastic holder.

**Capillary Veterinary**

- 206 806 \$5.95

Conventional mercury rectal thermometer, supplied in a sturdy plastic case. This thermometer is of a good size to hold, and has large easy-to-read temperature numbers reading 36°C to 43°C. Length 12cm o.a. Supplied in sturdy plastic case.

**Digital Veterinary**

- 206 818 \$10.95

Four times faster than ordinary glass thermometers. 'Beep' signals when to read temperature. No twisting or squinting to read. Display retains temperature reading. Range 32°C to 44°C. Length 12cm o.a. Supplied in plastic case.

**Digital Large Animal**

- 212 772 \$19.95

This longer than normal veterinary-type probe-thermometer is ideal for use on large animals. The probe is 12cm long, and the whole unit is robust and waterproof. A protective probe cover is supplied. Range 32°C to 42°C.

**NORMAL TEMPERATURES**

Following are normal temperatures for animals in degrees centigrade:

Cat	38.0 - 38.5	Deer	39.0 - 40.0
Dog	38.2 - 38.7	Pig	38.2 - 40.5
Sheep	38.4 - 41.0	Cow	38.6 - 39.0
Goat	38.4 - 41.0	Horse	38.1
