

Tank Blox 2kg

2-pack 206 385 \$49.95

Tank Blox can be used in small dams and large water containers to prevent algal growth. One block will treat about 70,000 litres (15,000 gal) of water. If less water is to be treated, break the block proportionately. Each block contains 63gm/kg of copper, present as copper sulphate. The block should take 2-4 weeks to dissolve. Replace when nearly all dissolved. Dams and tanks should still be cleaned regularly to ensure a clean water supply.

Note: Tank Blox are not recommended for human consumption.

Trough Blox 200gm

20-pack 206 937 \$49.95

Anyone wanting healthy and productive livestock of any kind will appreciate the importance of providing an adequate supply of clean water. Trough Blox are for use in any concrete or plastic water trough to prevent algal growth. Each block contains 63gm/kg of copper, present as copper sulphate. Use one block in 7,000 litres (1,500 gal) of water. Break up block for smaller troughs. The block should last 2-4 weeks. Replace when block is nearly all dissolved.

Note: Troughs should still be cleaned regularly to ensure clean water is provided to stock.

Mat-In-A-Box

complete 212 436 \$249.00

Here is the ideal shoe and boot disinfection mat for people who need to travel site-to-site and need a mobile disinfection facility. The foam-core mat is encased in a sturdy polyethylene box with lid. The mat can be pre-filled with solution, but will not spill, as the foam takes up all the liquid. It is then simply placed on the ground when required. No risk of spillage in a car boot or similar conveyance. Alternatively, the Mat-In-A-Box can be used at the entrance to sensitive premises and kept covered when not required. An ideal mobile disinfecting solution. Dimensions: 58cm L x 39cm W x 5cm D. Weight 4kg empty. Capacity 2.5L.

DISINFECTION MAT....

Sweetmat™

85cm x 60cm black	202 028	\$115.00
85cm x 60cm blue	202 029	\$115.00
85cm x 85cm black	202 030	\$145.00
85cm x 85cm blue	202 031	\$145.00
85cm x 180cm black	202 026	\$279.00
85cm x 180cm blue	202 027	\$279.00

Following experience gained from development and use of our Hoofmat for cattle lameness treatment, our high quality Disinfection Mats are now in high demand around the world for human use at entrances to disease sensitive areas and establishments. These mats feature a permeable upper fabric which enables disinfection of footwear, or anything else crossing it (dogs, vehicles, etc.). Bottom and sides are of non-permeable material to prevent leakage or leaching of disinfection solution. Simply pour solution on top of mat to fill: 85 x 60 holds 8 litres; 85 x 85 holds 12 litres; 85 x 180 holds 25 litres. All mats are 3cm thick, with a core of bonded urethane foam. To clean, place on edge and hose off. Leave to drain. Disinfection Mats can be used with any disinfectant or sanitiser.

Mini-Mat

printed 202 034 \$29.95

Another advanced development from our mat specialist Mr Peter Sweetman, is the Mini-Mat. This mat uses the same proven principles as our other Hoofmats and Disinfection Mats, but is designed as a very low-cost alternative where footwear disinfection is required at the entrances to contamination-sensitive premises. The Mini-Mat features a strong mesh upper welded to an antibacterial PVC outer. Outer dimensions are 45cm x 45cm x 25mm depth. Liquid capacity is 3.5 litres. The mats can be used with any type of disinfection liquid. To clean, place on edge, hose off, and leave to drain.

ULRICH...

Feeding Attractant 500ml

corn	211 220	\$59.95
fish	211 222	\$59.95
green apple	211 221	\$59.95

Attractants to lure wild boars and roe deer to a preferred feeding area, thus preserving other sensitive or more dangerous areas. Repeated use will reinforce a feeding behaviour and place. Mix the attractant with feed seeds or grains. They quickly become irresistible to the pigs. The green apple scent is very effective for deer as well as boars. Packaged in 500ml plastic bottle.

GAME SCENTS

We have located a range of scents and attractants from Ulrich in Europe. These unique products are made particularly for game hunters, either to attract game to a target area, or to obscure the scent of the hunter. Attractants are best used in spring and summer.

Boar Attractant Pine Tar

5kg 212 435 \$44.95

Pine tar is a useful attractant for wild boar. When it is applied to tree trunks and stumps in a certain area, boar will frequent that area to rub and wallow. The pine tar also has a protective effect against lice and ticks, which further encourages the boar to rub it in. Apply with brush.

ON SPECIAL

Liquid Crude for Pine Tar

1 litre 213 283 ~~\$69.95~~ \$39.95

Ulrich Liquid Crude is used in conjunction with Pine Tar to enhance attraction of pigs to feeding or wallowing places. It can be mixed with the tar, or used separately, to make an irresistible attraction. If being mixed, use 1 litre of Crude with 5 litres of Tar.
