

Spray Dye Biodye Blue

5 litre 210 190 \$172.50

Biodye Blue is a non-toxic, biodegradable marking dye to assist in clear identification of sprayed areas. Due to its high safety aspect, this product is ideal for use in urban or small-block areas close to human habitation.

Weed Burner Sievert Gardener

cpt (excl gas bottle) 207 182 \$199.00
ext hose only 207 183 \$79.95

For the organic gardener, or just those who do not wish to use weed killing chemicals, this is the tool to use. Light with the instant Piezo ignition, and sweep slowly along about 5cm (2") above the weeds. The plant only needs to be heated, not burned. The heating causes the cells walls to burst, and the plant dies. (To check this is achieved, pressing a leaf between fingertips should leave a dark green finger print). Leaves should fall after 2-3 days. Some hardier weeds will need repeated treatments through the growing season. Using the 0.34kg refillable hand-held propane bottle (as pictured) will give about 1 hour of continuous burn. A 3m extension hose is available for use with larger, heavier gas bottles, to give flexibility of use.

Funnel Flexi-tube Plastic

16cm dia 211 578 \$9.95
23cm dia 211 579 \$13.95

These plastic funnels are ideal for fuel filling as the flexible outlet tube can bend into a vertical fuel opening. A removable cleanable filter is incorporated. Dimension is funnel outer diameter. Removable spout tube is 17cm long o.a. (both funnels)

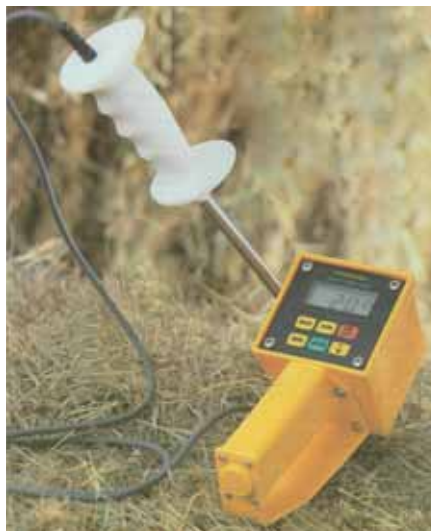

MOISTURE METER...

Grain Draminski

210 244 \$895.00

Draminski in Poland are a well known manufacturer of electronic farm instruments. Their grain moisture meter is proven around the world. Whole grain is poured into the meter. Grinding is not required. As supplied the meter is programmed for grains: rye, wheat, triticale, barley, oats, buckwheat and maize. Also for legumes; broad bean, yellow lupin, blue lupin, field pea and beans, and rape. The meter provides command prompts for testing procedure, so no memorization of complex procedures is required. A "data modification" mode is incorporated so that the user can make adjustments to the moisture curve to suit local conditions and specific varieties. The meter is powered by a standard 9 volt battery. Supplied in a handy carry-case.

Hay Draminski

210 243 \$995.00

Draminski in Poland are a well known manufacturer of electronic farm instruments. Their hay moisture meter is invaluable for determining moisture content of hay and straw, ensuring safest storage. The meter measures the electrical conductivity of hay or straw, converting into a moisture percentage reading, also giving the temperature at the same time. To achieve an accurate result the 56cm probe is pushed well into the bale or heap. At least five readings should be taken for accuracy of result. The unit can store these readings and then give the average result. The meter is powered by a standard 9 volt battery. Readings for moisture between 10% and 80%, and temperature from 1-100°C.

Marker Foam Standard

5 litre	\$39.95	20 litre	\$149.00
blue	204 417	blue	204 414
pink	204 418	pink	204 415
white	204 419	white	204 416

Suitable for use through any kind of foam generator to mark the edges of spray boom or other application patterns. Our Marker Foam has proven itself over many years use, to be highly reliable, stable and long lasting on the ground. The high adhesive factor resists wind movement on plants or bare ground. To use mix one litre of foam concentrate in 100 litres of very clean water (preferably rain water). With a suitable foam generator, ground speeds up to 20kph are still effective. Foam must always be used freshly mixed.

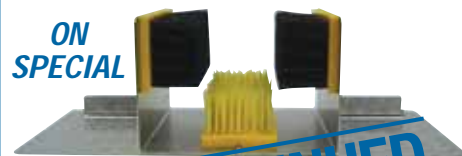

Boom Kleen

5 litre 200 861 \$23.95
20 litre 200 860 \$95.95

Spray booms need only the slightest traces of grain - spray chemicals (for example) to kill legume crops. Boom Kleen cleans and neutralises all internal pump, hose and boom surfaces. It in fact etches all internal surfaces back to bare metal etc. But even though it completely cleans out any spray residues, Boom Kleen is harmless to grasses and crops. Use it regularly, at the beginning and the end of the season, and also between different spray programs.

Note: Boom Kleen is a caustic substance. Handle with care. Shelf life should not exceed three years.

Boot Cleaner Brush

212 348 \$285.00 \$199.00

Our boot cleaner is made to stand up to heavy-duty use. The 59cm x 27cm floor plate is made of aluminium 'tread' plate. The vertical side brushes are mounted on an aluminium plate bracket. The big 23cm-long replaceable brushes have nylon bristles in plastic backs, and will last a long time. This cleaner will suit entrances to commercial premises.
