

TARAGATE

The Taragate is the award-winning flag-ship product of Taragate Ltd. Quick and simple to erect and swing across the raceway, or double back near the fence. Just tread the handle-post in when opened, to keep the wires off the ground. Tape is not supplied with Taragates as they are used in many differing gateway widths. Specially manufactured 20mm gate-quality Taratape is available for this purpose. The Taragate is not powered until it is latched closed. Even if one gate tape is damaged, the other tapes carry full power. Taragate components are UV stabilised for long life.

Taragate 2-Strand

kit (excl tape) 206 407 \$45.95

The 2-strand Taragate is ideal for weaned calves, through to mature cattle. Made for two tape strands about 45cm apart. Tape tension is maintained by the poly-bow on the hinge end. The Taragate handle can be 'stepped-in' across a raceway, or back along the fence line. This is a great feature. Instructions included.

Taragate 4-Strand

kit (excl tape) 206 408 \$65.95

The 4-strand Taragate is suitable for all animals, from sheep and calves to cattle. Made for four tape strands over 80cm, top to bottom. Gate tension is maintained by four galvanised springs on the four tape strands. The Taragate handle can be 'stepped-in' across a raceway, or back along the fence line. Instructions included.

Note: The nylon buckles in the above photo are optional accessories, not supplied with the standard kit package, but recommended when 40mm tape is used.

Tarabungy Gate Complete

- 5-metre kit cpt 206 400 \$29.95
- 5-metre repl't cord only 206 401 \$9.55
- 6-metre kit cpt 206 402 \$30.95
- 6-metre repl't cord only 206 403 \$10.75

Tarabungy is a single-strand gate made of specially developed stretch-cord. It is white like all Taragate gate products, for maximum visibility. Tarabungy is electrified when the handle is attached to its latch. Tarabungy contains 6 tinned-copper conducting wires. A patented Tarabungy feature is the Taraconnect spring clip system which guarantees good and reliable current flow into the gate cord. The 5m Tarabungy is suitable for gateways from 2m to 5.5m, and the 6m Tarabungy gateways 3m to 6.5m wide.

Taragate 4-strand Lifestyler

kit complete 212 184 \$79.95

The 'Lifestyler' version of the 4-strand Taragate includes 25m of 20mm Taratape, which is suitable for a gate up to 6m. As this kit comes complete with tape it is ideal for the 'lifestyle' farmer who may not want to buy a 100m roll of tape to make up one or two gates.

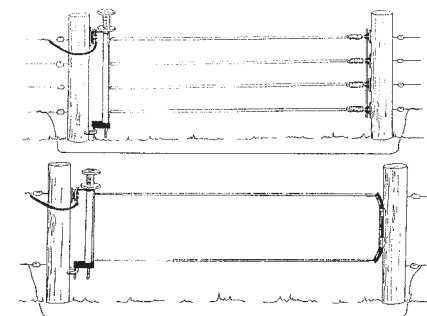

Diagram showing arrangement of 2-strand and 4-strand Taragates.

Tarabungy Cord

50m roll 211 928 \$199.00

Tarabungy is a 'new era' specially-developed gate cord from Taragate. It features an extra layer of braided polyethylene, compared to other bungee cords on the market, to protect the latex rubber inner cores from harmful UV radiation. This makes Tarabungy more durable than other bungee cords. Tarabungy also features six stainless steel conductivity strands to ensure reliable shocking. Cut cord to about 2/3 length of gate required, to give preferred tension. (i.e. Cut 3m for a 5m gateway.)

Tarabungy Gate Kit

(bungee not incl.) 211 926 \$16.95

The new Tarabungy gate kit lets you make up your own bungee gate to the exact length you require. The kit includes: Clip-away handle, Taravator gate activator, hinge-point insulator and two Taraconnect bungee connectors. This kit should be used with Tarabungy gate cord, available in a 50m roll, to provide economical and highly effective bungee gates.

Taratape Gate Kit

40mm (excl tape) 206 428 \$19.95

Use this kit to make up a gate of any length using Taratape off the roll. Supplied with metal buckles to suit tape up to 40mm wide.

Taraspring Gate 5m

kit 206 420 \$25.95

repl't spring 206 421 \$11.95

The Taraspring gate can be used in gateways from 1m to 5.5m wide. The big diameter Taraspring is white for enhanced visibility and safety (very important for motorbike riders). Also the white powder coating extends the spring life.

Features: Clip-away gate handle
Taravator activator
