## EZ MILKER....

### EZ MILKER

The EZ Milker was invented and developed in Minnesota, USA by Mr Buck Wheeler. Although it was developed originally for milking mares it is now supplied in models for sheep, goats and cows, but can equally be used on almost any other large animal if required. The EZ Milker is ideal for collecting colostrum either for immediate use, or for freezing in the bottle for later use. (Extra bottles are available.) The Milker is supplied as a kit complete with the vacuum pump, milk collection tubes and liners, and two collection bottles. The EZ Milker pump is very efficient, only requiring 3 or 4 squeezes to create effective vacuum. Milk is extracted surprisingly quickly and efficiently. Pulsation is not required. The EZ Milker is also a useful and practical device for lifestyle or small-block holders wishing to collect small amounts of milk for specialty cheeses or other uses. Full instructions for use are supplied with each milker. The milker should be cleaned with warm detergent water after each use.

### Goat

complete 212 012 \$349.00  
The goat milker is provided complete with two x 1-litre milk collection bottles, two sizes of collection tube and two sizes of silicone liner for the collection tubes. These ensure easy milk collection from all sizes and breeds of goats. Extra milk collection bottles are available.

### Cow

complete 212 057 \$349.00  
The cow milker is provided complete with two x 1-litre milk collection bottles, two sizes of collection tube and two sizes of rubber liner for the collection tubes. These ensure easy collection of milk from any cow, heifer, buffalo or other breeds. Extra milk collection bottles are available.

### Mare

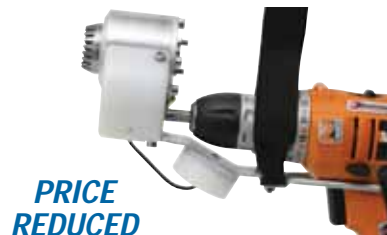

complete 212 011 \$299.00  
The mare milker is supplied complete with two 500ml milk collection bottles and one of each 26mm and 28mm (i.d.) milk collection tubes. If milking a newly-foaled mare you may need to clear the wax plug from the teat ends before milking. Once the milk begins to flow, stop pumping until more vacuum is required. Bottle feeding colostrum to a new-born foal ensures adequate immunisation. If a mare has surplus quality colostrum, some should be frozen for future use. The Mare EZ Milker is equally useful for ponies, mules, donkeys, camels or zebras. Extra milk collection bottles are available.

NB: Liners are not required with the mare milk collection tubes.

### Sheep

complete 212 014 \$349.00  
The sheep milker is provided complete with two 500ml milk collection bottles, two sizes of collection tube and two sizes of silicone liners for the collection tubes. These ensure easy milk collection from any sheep, llama, alpaca, miniature horse, and also from other pygmies and exotics. Extra milk collection bottles are available.

DRILL NOT INCLUDED

### Tailwell Tail Trimmer

(drill not incl) 212 915 ~~\$795.00~~ \$695.00  
repl't blade set 213 888 \$129.00

Developed in New Zealand, this is a remarkable device. It is a simple chuck-attachment for any quality power drill of at least 14 volts, and preferably two speeds. (Lower-powered drills are not adequate.) The front of the device has a fixed circular inner blade over which the outer circular blade oscillates. The cutting action is smooth and fast, taking only 3 or 4 seconds to run up the tail. Even dirty dag-ends feed smoothly over the trimmer. Pre-cutting the tail's switch is not necessary. This is a sturdy, but precision tool, that will withstand considerable use. Gear oil is introduced at the start of use, and after each 50-100 tails, through an external lubrication point provided. The cutter tension is adjustable. Replacement blade set is available. A neck strap is provided to allow the operator to be hands free between cows. Trimming can easily be accomplished during milking. Full operating and service instructions included.

PRICE REDUCED

### Scissors Tail Trimming

22cm 205 606 ~~\$16.95~~ \$14.95  
ABS plastic handles make these heavy duty scissors more comfortable to use. Stainless steel blades. Serrated blade reduces blade slippage making these scissors ideal for tail cutting and other animal grooming work. Length 22cm o.a.

New

### Scissors Tail Trimming Heavy Duty

24cm 214 444 \$24.95  
We now offer a sturdier version of our well known tail trimming scissors. These are made from cast stainless steel and feature a serrated jaw to reduce slippage. The plain handles are easier to hold at the variety of angles needed for trimming tails. They are spring opening, to reduce hand strain, and have a simple hook closure lock. Length 24cm o.a.

### Tail Trimmer Apron

212 164 \$135.00  
An ideal accessory for the power tail-trimmer is our specially designed apron. This garment incorporates a large bag with rigid plastic hooks which are hung on the pit rail where they can easily be slid along cow-to-cow. (The hooks are suitable for rails up to 50mm diameter.) When the bag needs emptying the wearer simply steps out to the required place and pulls the Velcro bag attachment apart, letting the trimmings fall out. Bag will hold 50-100 tail trimmings.
