CALF PULLER....

Economy
complete 201 006 \$349.00

Made in the same style as our famous HK brand pullers. All galvanised or nickel-plated steel. This puller features a 1.6m long 'threaded' shaft, which breaks in half for easy transport. Traction assembly with 35cm long handle, for easy use and choice of sequential or tandem pulling points. The head frame is steel, but with well rounded edges to prevent injury, and also incorporating a rump chain to better retain the puller head on the cow. The puller is supplied complete with ropes. This device is reasonable quality at a very good price. Parts available.

Fast-Lock
complete 219 055 \$299.00

Although this all-stainless and nylon 3-pulley system is useful for many pulling or lifting jobs, one of its popular uses is as a calf puller. Attach the single block to an anchor point not more than two metres from the calf, then using calving chains or ropes on the calf's legs, connect the double-pulley block to the calf. The rope lock and release mechanism on the double-block is then easily and conveniently operated at the same time as checking the birth is progressing correctly. The Fast-Lock pulley system uses 7.2m of 10mm polyrope, and is supplied in a convenient self-draining carry bag. All stainless steel componentry.

Straps Low Trauma
pair 201 032 \$37.95

Designed and manufactured by an Australian vet, these straps eliminate the leg damage and trauma to the calf commonly caused by traditional chains and ropes. They are ideal for use on your calf puller, or for manual use using hand-loop ends. The extra rings allow for different pulling lengths. Straps are 75cm long and will not break or wear.

EMBRYOTOMY....

Wire Aesculap
12m 202 522 \$75.95

High-quality German-brand saw wire for embryotomy and dehorning. Convenient spool dispenser pack.

Wire Handles
pair 218 530 \$29.95

These stainless-steel handles are very comfortable to use. Simple screw action clamps wire into groove. Length 10.5cm o.a. Supplied as pair.

PRICE REDUCED

Wire Handle T-clamp
each 202 528 \$79.95 \$49.95

T handle is easiest wire handle to use, simply clamping on wire as it is gripped. This allows easy movement along wire without interrupting the job. Supplied as each.

Umbilical Cord Clamp
50-pack 210 697 \$15.00
100-pack 210 698 \$25.00

Recent research has confirmed that several diseases, including E.coli scours and Joint-ill, find their way into the newborn animal via the umbilical cord. Sprays and dips can also cause problems. Our umbilical clamps are the solution. Simply attach as soon as possible after birth. Remove after 24 to 48 hours. Place clamp approximately 5mm from top of umbilical cord. Cut cord below clamp to prevent suckling. Clamps can be disinfected and re-used if desired, or can be left to fall off naturally. Ideal for piglets as clamps are large enough not to fall through creep floors. Clamps 65mm long o.a.

New **Naval Anti-Suckle Spray**
400ml 219 166 \$22.95

This product was developed to spray on piglets to reduce bite injuries, but it is reputed to be similarly effective at reducing or preventing naval suckling by calves. 400ml aerosol.

Head Snare Rod-type
203 544 \$49.95

All stainless steel snare for assisting calving. Hook behind calf's ears to assist birthing in normal deliveries in conjunction with traction aids on legs. Use with care on calf's head and eyes, and ensure there is no strangulation. Can also be used as a leg snare in non-normal deliveries, to straighten legs. Length 75cm o.a.

Head Snare Cable-type
203 543 \$59.95

Very useful device for difficult calvings. Enables traction on head, or just prevention of head turning back during the delivery. Stainless steel cable with cast alloy sliding yolk. Can be dismantled for cleaning. Length 92cm o.a.

Eye Hook
blunt 6.5cm 202 814 \$19.50
blunt 8cm 202 816 \$19.50
sharp 8cm 202 818 \$19.50

Dimension is length of hook overall. Use with extreme care, under veterinary supervision.

Rope Threader
light 205 410 \$12.95
heavy 205 408 \$19.95

Stainless steel. Quality design. Light version is 4mm steel, length 18cm o.a. Heavy is 8mm steel, length 21cm o.a.

Rope & Wire Threader Bahlcke
economy 205 403 \$39.95

A conventional rope threader combining one heavy bulbous end to assist with placement of embryotomy wire around limbs, etc. The wire is threaded into the bulb which is then turned to lock wire in. All stainless steel. Length 20cm o.a.
