KICK STOP....

KICK STOPS FUNCTION

These devices are used primarily to prevent kicking during milking, but can also be useful during some veterinary procedures. The device is hooked under the flank just in front of the back leg, and the top end then is hooked over the backbone. This seems to have some psychological as well as physical effect in stopping kicking.

QRS button for easy length adjustment

Quality

| | | |
|-------------|---------|----------|
| complete | 204 073 | \$149.00 |
| spares kit* | 204 075 | \$39.95 |

For those who find a standard Kick Stop device frustrating - hard to change size, going rusty etc., we now have the ultimate version. All stainless steel, with nice to operate Quick Release System® buttons for length adjustment even when the device is under load. No more trying to push in the little dimple pins with your thumb nail. This is a quality tool which should last your lifetime. There is a red cap for the longer back-bone hook, and a blue cap for the bottom-end flank hook. Maximum opening 75cm. *Spares Kit includes one of each red and blue caps, plus two of the special QRS springs.

Improved

| | | |
|-------------------|---------|---------------|
| complete | 204 069 | \$32.95 |
| spares kit* | 204 070 | \$19.95 |
| spring only (9mm) | 204 071 | \$4.95 \$3.95 |
| cap blue each | 204 074 | \$4.95 \$3.95 |
| cap red each | 209 954 | \$4.95 \$3.95 |

Even very simple devices can be improved with some intelligent design work. Our Improved kick stop has different hook shapes to suit the back bone and the flank - the backbone hook is longer, and has a red cap to distinguish it. The length-adjustment knobs are a large, easy-to-use 9mm diameter, and are offset from centre so they are not accidentally depressed by contact with the shed breach rail. The end caps are of a new firmer material which will not come off so easily. All heavy duty galvanised steel. Maximum opening 70cm. *Spares kit contains 1 of each blue and red caps, plus 4 x replacement springs.

Pre 2003 Spring Only

| | | |
|-----------------|---------|--------|
| spring only 7mm | 204 065 | \$4.45 |
|-----------------|---------|--------|

Pre 2003 Kick Stops used a smaller 7mm diameter-head spring. These devices will not accept later 9mm-head springs.

NB: Parts supplied here may not fit kick stopping devices supplied from other manufactures.

Tail Holder Clamp

| | |
|---------|---------|
| 206 361 | \$15.95 |
|---------|---------|

If you don't like docking your cows, but those tails still drive you potty, try this big galvanised steel clamp. Either have a couple of roving ones tied on stretch-cord, or equip each bale with a drop! Won't harm the cow. Save your temper! Clamp jaws are 14cm long with 14cm diameter 'hole'.

Kow Kant Kick

| | |
|---------|----------|
| 204 072 | \$259.00 |
|---------|----------|

Kow Kant Kick is the brand of this kick stopper which has a long history in USA. We believe this is the most humane as well as the most effective device available for taming unruly cows during milking. Fits any size animal, fitting over the back, with tips into the flanks above the udder. Closing the clamp depresses the muscles that control kicking. Also useful during veterinary examinations, surgery, etc. If this doesn't work, you will just have to send her down the road!

The dawn of latté

MUCK SCRAPER....

Plain-Head 55cm Powder Coated

| | | |
|--------------|---------|-----------------|
| (nil handle) | 215 413 | \$34.95 |
| repl't blade | 219 295 | \$16.95 \$14.95 |

This scraper is made from steel, powder-coated to prevent rust. Plain head - does not swivel. Great for use between cows' legs from pit. Width 55cm. (Handle not supplied.)

Curved 66cm Galvanised

| | | |
|--------------|---------|-----------------|
| (nil handle) | 215 412 | \$62.95 |
| repl't blade | 217 299 | \$24.95 \$19.95 |

Another useful scraper for working from the pit in a herringbone shed. Galvanised steel. Clamp for handle attachment. (Handle not supplied.) Replaceable rubber strip. Width 66cm.

PRICE REDUCED

Swivel-Head 55cm Galvanised

| | | |
|------------------|---------|-----------------|
| (nil handle) | 210 017 | \$99.00 \$79.95 |
| repl't blade set | 211 472 | \$24.95 \$22.95 |

Here is a very handy scraper for pushing muck off the milking platform in a herringbone dairy. Width is 55cm overall. Construction is galvanised steel. The interesting feature of this device is the swivel connection to the handle, which allows the scraper to be 'steered', between cows' legs for example, with minimal effort. Fitting for 32mm wood handle (not supplied). Replacement rubber blade includes bolts set.

Hose Nozzle Black Rubber

| | | |
|----------|---------|--------|
| complete | 208 249 | \$7.95 |
|----------|---------|--------|

Hard-wearing rubberised nozzle with adjustable spray pattern. Suitable for most farm use. Complete with quick coupling.

RECOMMENDED

Hose Nozzle Metal-Body

| | | |
|----------|---------|---------|
| complete | 215 515 | \$11.95 |
|----------|---------|---------|

A hose nozzle with aluminium-alloy body, for really rough jobs. Adjustable spray pattern. Also with quick-couple nipple. Use this one if you are having trouble with breakages of plastic nozzles and hose connectors.
