Quick Straps are the easiest of all leg straps to use, and are the most visible on the cow. The protruding end of the Quick Strap is like a 'flag' waving on the cow's leg. The Quick Strap is removed simply by pressing the release button!

For added safety we recommend using Quick Straps on both legs of antibiotic treated cows. Quick Straps are not supplied pre-printed. Marking pens will give temporary marks suitable for short-term notices if required. Sold as each.

Dairymen have used a variety of products for quick and easy temporary identification in the cowshed. Plastic insulation tape is often used, but this can often shrink after application and cause some pain and aggravation. Ordinary hardware-store duct tape is cheap, and is easy to apply, but generally falls off in a very short time as water penetrates the plastic coating and causes the cloth to fall apart. Our special-manufacture Leg & Tail tape is made for the purpose. It is a polyethylene-coated water-proof cloth-backed tape that is easy to rip, will not shrink, and will stay on the leg or tail for up to three weeks. Tape is 48mm wide. 10m roll is handy pocket size.
