

VACCINATOR....

ON SPECIAL

Henke Pistol Grip (Roux Syringe)

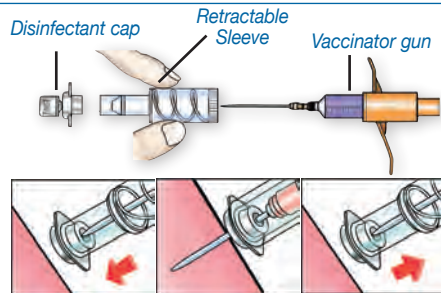

10ml	206 995	\$139.00	\$99.95
30ml	206 996	\$119.00	
50ml	206 997	\$119.00	

Glass barrel, and lack of any valves, make these quality syringes from Henke of Germany ideal for iron, copper or other corrosive pharmaceuticals. Luer-lock needle adaptor. Barrel volumes 10ml, 30ml and 50ml.

Dose rates: The 10ml syringe can be set to 0.25ml, 0.5ml or 1ml per trigger pull. The 30ml and 50ml syringes can be set to 1ml, 2ml, 3ml, 4ml or 5ml per trigger pull.

PISTOL GRIP VACCINATOR

Pistol Grip syringes are not very well understood in N.Z. and Australia. The great thing about them, apart from ease of use, is that there are no valves or tubes to clog or clean, and displacement is positive. Injectable is simply sucked in through the needle directly from the vial, by pulling the plunger out. The dose rate is set, and each trigger pull gives the exact amount. In many cases, injectable remedy can be left in the syringe and stored as required until next use. Almost nothing can go wrong with these.

Sterimatic Needle Sanitiser

starter kit cpt	210 277	\$48.95
Stericaps 5-pk	210 279	\$29.95

Sterimatic is a UK-invented and patented system that prevents needle-stick injuries during vaccination jobs and reduces injection-site infections and abscesses. The system also reduces the potential of disease transmission from one animal to another. The Sterimatic system comprises a retractable sleeve which is fitted over the vaccinator needle and a disinfectant-impregnated quick-change Stericap which is placed on the end of the sleeve. The sleeve covers the needle completely, preventing accidental needle-stick injuries to the user. Each time the vaccinator is used, the Sterimatic sleeve slides back drawing the disinfectant-impregnated Stericap over the needle. In this way, the needle is sanitised each time it is used. A new stericap should be fitted after 100 injections. Sterimatic will fit all popular models of vaccinator.

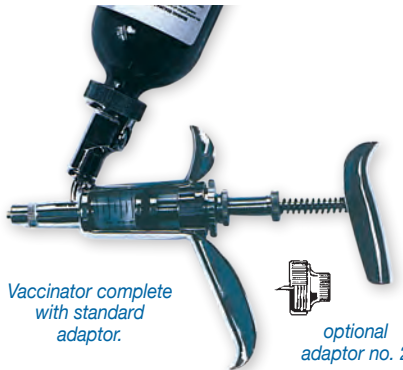

The Sterimatic Kit comprises one sleeve assembly plus five stericaps and five needles. The needles are 1" x 18g (although in the Sterimatic the needle is effectively 1/2"). The Stericaps 5-pack comprises five disinfectant caps plus five needles.

Henke Vet-matic

5ml	207 001	\$169.00
10ml	207 000	\$239.00

All metal high-quality German-manufactured Henke Vet-matic auto vaccinator at a good price. Note these features:- 5ml or 10ml, permanently etched glass barrels for dose accuracy, comfort grip with delivery into back handle to clear animal, finely accurate dose adjustment, resistant to all vaccines and injectables, all parts available. Ideal for BVD and lepto vaccinations. The Vet-matic vaccinator is supplied with silicone delivery tubing, air-entry ascending tube (for bottle use) and full parts list and diagram.

Henke Ferro-matic 5ml

complete	206 988	\$255.00
adaptor No. 2	206 989	\$95.00

The Ferro-matic vaccinator is manufactured by Henke-Sass Wolfe of Germany. This company is known around the world for its manufacture of high quality medical and veterinary equipment. The Ferro-matic is especially for use attached directly to the vial or remedy bottle, in packs up to 100ml. An air inlet system is incorporated to prevent vacuuming of the bottle. If remedy is in a pillow-pack (collapsing) bottle, where air admission is not desired, the optional No. 2 adaptor should be used.
